Ziesar		"	19 B	1 F/S
Wurzen		"	16 B	-
Frankfurt/Oder, boundary		military goods	20 B	-
Liebertwolkowitz		"	2 B	-

2

25X1 1. ☐ Comment. The supply with spare parts from the USSR of the GOFG central tank spare part depot considerably increased during the last months in 1953 and in January 1954, after it had temporarily decreased between August and October 1953. In 1953, the annual average was 85 carloads per month. In January 1954, this average was surpassed 50 percent.

25X1 2. ☐ Comment. The shipments from and to Muellrose confirm regular traffic between the GOFG depot at Muellrose and the tank repair plants of the individual armies. Almost all the railroad stations mentioned were previously reported in connection with spare parts shipments from East German industrial enterprises.
